

Tara Rachinsky, PhD

Selected Medical Communications Projects

Manuscripts
Post hoc analysis of phase 3 clinical trials in Parkinson's disease
Post hoc analysis of phase 3 clinical trials in atopic dermatitis
Review of intratumoral delivery of immunotherapeutics
Review of in-office administration of biologics in plaque psoriasis
Retrospective study of hormonal therapy in pelvic pain
Phase 3 trial of patient-reported outcomes in chronic hepatitis delta
Phase 3 trial in major depressive disorder
Population pharmacokinetics in major depressive disorder [manuscript outline]
Phase 4, real-world study in patients with moderate-to-severe psoriasis
Preclinical study of CRISPR-based editing in HIV-1
Phase 4 trial in patients with focal seizures [manuscript outline, introduction]
Review of fourth-line treatment with ripretinib in advanced gastrointestinal stromal tumor
Secondary clinical trial in advanced basal cell carcinoma
Preclinical study of muscle-targeted delivery of oligonucleotide therapeutics [manuscript outline]
Phase 1/2a study of antisense oligonucleotide in myotonic dystrophy type 1
Review of telemedicine in obesity care
Preclinical study of gene therapy in a mouse model of Duchenne muscular dystrophy
Subgroup analysis of phase 3 clinical trials in endometriosis-associated pain
Report on a large biomedical database to characterize hearing loss and otitis media in patients with Down syndrome
Abstracts and Posters
Phase 1 trial of a frataxin replacement therapy for Friedreich's ataxia
Phase 1 trials of safety, tolerability, and pharmacokinetics in Friedreich's ataxia
Phase 3b trial of oral versus injectable methods of treatment in atopic dermatitis
Phase 3 trial of skin improvement thresholds in atopic dermatitis
Phase 3 trials of health-related quality of life in patients with atopic dermatitis
Phase 3 trials of itch improvement in patients with moderate-to-severe atopic dermatitis
Phase 3 trials of skin improvement in patients with moderate-to-severe atopic dermatitis
Phase 3 trial in uterine fibroids and heavy menstrual bleeding
Phase 3 trial in endometriosis-associated pain
Real-world study in endometriosis
Medical Education Grants and Needs Assessments
Type 1 diabetes diagnostic challenges and therapeutic advances
Hepatitis B treatment and monitoring strategies

Nonobstructive hypertrophic cardiomyopathy
Acute pain management
Drug-induced pulmonary arterial hypertension (PAH)
Updates for biosimilars in inflammatory bowel disease (IBD)
Individualizing menopause care
Plasminogen deficiency type 1 (PLDG-1) diagnosis and treatment
Quadruple therapies in multiple myeloma
Stargardt disease diagnosis and therapy
Anticoagulation therapy in atrial fibrillation and acute coronary syndrome
Biosimilars in IBD
Antibody-drug conjugates for HER2 and TROP2 in non-small cell lung cancer (NSCLC)
Risk evaluation and mitigation strategy (REMS) for opioid use in patients with cancer
General support for meeting of comprehensive ophthalmologists
Treatment options for EGFR-mutated NSCLC
General support for meeting of retina specialists
Diagnosis and treatment of hepatorenal syndrome-acute kidney injury
Anti-VEGF treatment regimens in nAMD and DME
Biosimilars in ulcerative colitis
Biosimilars in rheumatoid arthritis
Expanding refractive surgery options
Emerging oral therapies for diabetic retinal disease
Promoting adherence to medical therapies for glaucoma
Understanding biosimilars and integrating them into patient treatment plans
Biosimilar optimization in inflammatory diseases
Innovative technology in the cataract surgical setting
Diabetic retinopathy treatment
Reducing treatment burden for diabetic macular edema (DME)
Alpha-thalassemia diagnosis and treatment
Generalized myasthenia gravis new and emerging therapies
Virtual practice in diabetic retinopathy
Molecular diagnostics for bloodstream infections, pneumonia, and CNS infections
Neuromyelitis optica spectrum disorder (NMOSD)
Guidelines and therapeutic approaches for treating rosacea
Management of ulcerative colitis (UC) and Crohn's disease (CD)
Targeted agents for HER2+ breast cancer
Targeted therapies for preventive and acute treatment of migraine
Slides and Presentations
Diagnosis and management of migraine
Integrating biosimilars into patient care
Gene therapy for X-linked retinitis pigmentosa

Treatments for atopic dermatitis
Treatments for rheumatoid arthritis
Adeno-associated virus (AAV) gene therapy vector for hemophilia A
Meeting Summary
Effective clinical trial designs addressing resistance to immune checkpoint inhibitors
Manuscript Editing
APTw and mDIXON-quant for identifying ovarian endometriotic cysts
Imaging using DANTE-SPACE, PETRA, and MPRAGE for evaluation of brain tumors
Magnetic resonance for right ventricular function in type 2 diabetes mellitus
Real-world study of treatment for carbapenem-resistant Gram-negative bacterial infections
Convolutional neural network in contrast-enhanced magnetic resonance imaging
Model for tissue outcomes of thrombolytic therapy in acute ischemic stroke
Filter-exchange imaging (FEXI) for measuring exchange processes in human brain
A 24-channel head and spine integrated coil system for pediatric MRI
An fMRI study of brain networks in Alzheimer's disease
T1-weighted magnetic resonance black-blood imaging in acute deep vein thrombosis
Hemodynamics in ischemic stroke and transient ischemic attack
Imaging in acute middle cerebral artery ischemic stroke
Molecular signaling in the development of precerebellar nuclei
