

## Selected Medical Communications Projects

<b>Manuscripts</b>
Post hoc analysis of phase 3 clinical trials in Parkinson's disease
Phase 3 trial in major depressive disorder
Population pharmacokinetics in major depressive disorder [manuscript outline]
Phase 4 study in patients with focal seizures [manuscript outline, introduction]
Preclinical study of CRISPR-based gene editing for treatment of HIV
Phase 1/2a study of antisense oligonucleotide therapy in myotonic dystrophy type 1
Preclinical study of exon-skipping oligonucleotide therapy for Duchenne muscular dystrophy
Preclinical study of muscle-targeted delivery of oligonucleotide therapeutics [manuscript outline]
Review of intratumoral delivery of immunotherapeutics
Secondary clinical trial in advanced basal cell carcinoma
Review of fourth-line treatment with ripretinib in advanced gastrointestinal stromal tumor
Phase 4 study in patients with moderate-to-severe psoriasis
Review of in-office administration of biologics in plaque psoriasis
Post hoc analysis of phase 3 clinical trials in atopic dermatitis
Phase 3 trial of patient-reported outcomes in chronic hepatitis delta
Review of telemedicine in obesity care
Subgroup analysis of phase 3 clinical trials in endometriosis-associated pain
Retrospective study of hormonal therapy in pelvic pain
Report on a large biomedical database to characterize hearing loss and otitis media in patients with Down syndrome
<b>Medical Education Grants and Needs Assessments</b>
Neuromyelitis optica spectrum disorder (NMOSD)
New and emerging therapies for generalized myasthenia gravis
Targeted therapies for preventive and acute treatment of migraine
Acute pain management
Risk evaluation and mitigation strategy (REMS) for opioid use in patients with cancer
Plasminogen deficiency type 1 (PLDG-1) diagnosis and treatment
Stargardt disease diagnosis and therapy
Antibody-drug conjugates targeting HER2 and TROP2 in non-small cell lung cancer (NSCLC)
Treatment options for EGFR-mutated NSCLC
Targeted agents for HER2+ breast cancer
Quadruple therapies in multiple myeloma
Alpha-thalassemia diagnosis and treatment
Hepatitis B treatment and monitoring strategies
General support for meeting of comprehensive ophthalmologists
General support for meeting of retina specialists
Reducing treatment burden for diabetic macular edema (DME)

Anti-VEGF treatment regimens in nAMD and DME	
Expanding refractive surgery options	
Emerging oral therapies for diabetic retinal disease	
Promoting adherence to medical therapies for glaucoma	
Innovative technology in the cataract surgical setting	
Diabetic retinopathy treatment	
Virtual practice in diabetic retinopathy	
Diagnosis and treatment of hepatorenal syndrome-acute kidney injury	
Nonobstructive hypertrophic cardiomyopathy	
Anticoagulation therapy in atrial fibrillation and acute coronary syndrome	
Drug-induced pulmonary arterial hypertension (PAH)	
Type 1 diabetes diagnostic challenges and therapeutic advances	
Management of ulcerative colitis (UC) and Crohn's disease (CD)	
Updates for biosimilars in inflammatory bowel disease (IBD)	
Biosimilar optimization in inflammatory diseases	
Biosimilars in IBD	
Biosimilars in ulcerative colitis	
Biosimilars in rheumatoid arthritis	
Understanding biosimilars and integrating them into patient treatment plans	
Molecular diagnostics for bloodstream infections, pneumonia, and CNS infections	
Guidelines and therapeutic approaches for treating rosacea	
Individualizing menopause care	
<b>Abstracts and Posters</b>	
Phase 1 trial of a frataxin replacement therapy for Friedreich's ataxia	
Phase 1 trials of safety, tolerability, and pharmacokinetics in Friedreich's ataxia	
Real-world study of treatment for endometriosis	
Phase 4 study of treatment for uterine fibroids and heavy menstrual bleeding	
Open-label study of long-term safety in patients with endometriosis-associated pain	
Phase 3 trials of health-related quality of life in patients with atopic dermatitis	
Phase 3b trial of patient preference for oral versus injectable treatments in atopic dermatitis	
Phase 3 trial of skin improvement thresholds in atopic dermatitis	
Phase 3 trials of itch improvement in patients with moderate-to-severe atopic dermatitis	
Phase 3 trials of skin improvement in patients with moderate-to-severe atopic dermatitis	
<b>Slides and Presentations</b>	
Adeno-associated virus (AAV) gene therapy vector for hemophilia A [congress presentation]	
Gene therapy for X-linked retinitis pigmentosa [HCP education]	
Diagnosis and management of migraine [HCP education]	
Integrating biosimilars into patient care [HCP education]	
Phase 3 studies of rapid skin improvement in atopic dermatitis [congress presentation]	
Phase 3 studies of rapid itch improvement in atopic dermatitis [congress presentation]	
Treatments for rheumatoid arthritis [discussion deck]	

<b>Substantive Manuscript Editing</b>
An fMRI study of brain networks in Alzheimer's disease
Imaging using DANTE-SPACE, PETRA, and MPRAGE for evaluation of brain tumors
Cardiovascular magnetic resonance feature tracking in myocardial amyloidosis
Filter-exchange imaging for measuring exchange processes in human brain
Automated segmentation of the left ventricle using magnetic resonance cine imaging
T1-weighted black-blood MR for catheter-directed thrombolysis in acute deep vein thrombosis
Plaque characteristics and hemodynamics in ischemic stroke and transient ischemic attack
Cardiovascular magnetic resonance for right ventricular function in type 2 diabetes mellitus
Susceptibility-weighted imaging in acute middle cerebral artery ischemic stroke
Model for tissue outcomes of thrombolytic therapy in acute ischemic stroke
Amide proton transfer-weighted imaging and R2* mapping for ovarian endometriotic cysts
Real-world study of treatment for carbapenem-resistant Gram-negative bacterial infections
Convolutional neural network in contrast-enhanced magnetic resonance imaging
A 24-channel head and spine integrated coil system for pediatric MRI
Molecular signaling in the development of precerebellar nuclei
<b>Meeting Summary</b>
Effective clinical trial designs addressing resistance to immune checkpoint inhibitors
<b>Additional Medical Communications</b>
Reprint HCP cover letter on Phase 3 OLE in generalized myasthenia gravis
Reprint field memo on Phase 3 OLE in generalized myasthenia gravis
